

Environmental Investigation and Remediation

Broad Expertise

The professional staff at ESI have over 100 years of combined environmental experience, successfully completing projects as varied as commercial UST removal and remediation to complex, highly polluted brownfield restoration and redevelopment sites.

Our environmental investigators, scientists, engineers, and project managers work closely with our clients to ensure that their concerns are addressed, their environmental issues are fully identified, that appropriate remedies are engineered and deployed, and that they can reach site closure and regulatory compliance on time and on budget.

Every single time!

National Scope, Local Knowledge

ESI has successfully completed large-scale projects across a broad range of industries for clients in every state in the US and abroad.

We have the knowledge and experience necessary to navigate environmental regulatory requirements at federal, state, and local levels, and to provide expert advice and negotiation support to our clients at every step during the permitting, reporting, and final closure phases of any environmental project.

Services

- » Workplace Consulting
- » Environmental Auditing
- » Site Assessment, Investigation, & Remediation
- » Engineering Design & Deployment
- » UST & AST Tank Services
- » Decommissioning, Demolition, & Construction
- » System Maintenance & Upgrading
- » Air Quality Assessment
- » Regulatory Compliance and Certification
- » Permitting

- » Pharmaceutical & Medical
- » Resort & Hospitality
- » Chemical Companies
- » Banks & Insurance Companies
- » Consumer Retail
- » Commercial & Industrial Real Estate
- » Food Production & Delivery
- » Residential Developers

Environmental Justice

In 2020, New Jersey passed the most comprehensive environmental justice (EJ) law in history. For the first time, select industrial sites located in overburdened communities (OBCs) would be forced to reduce certain environmental impacts through their own methods or via new permit conditions. For new sites or major expansions at existing sites, this process could lead to denial of permits. Since the NJ law passed, at least 24 states have proposed or recently enacted their own EJ rules that cherry pick from the NJ model. In all cases, community engagement has become a central focus of the permitting process.

ESI experts are familiar with state and federal regulatory frameworks and have been at the forefront of this issue for years. Having an accurate accounting of your environmental impacts will help prepare your site to comply with any EJ compliance program.

LSRP Services

Our in-house Site Remediation Professionals (LSRP) are licensed by the NJ Department of Environmental Protection to oversee property pollution remediation projects from site investigation to full compliance with minimum state oversight.

Our LSRPs have decades of experience resolving environmental damage. Every day, we're working to repair pollution impacts and reach regulatory compliance on sites across New Jersey. And every day, we ensure that our clients receive the most appropriate solutions, on time and on budget.

Clients

ESI is proud of our continuing successful completion of projects for a wide range of clients. Since 1975, we've provided environmental consultation and remediation services for clients ranging from Fortune 500 companies to international industrial conglomerates, and so much more.

Our innovative approach to program customization and our experience with a wide range of environmental technologies, along with our understanding of our clients' needs and objectives, allows ESI to offer a broad range of environmental services, delivered by the most experienced personnel, in the most efficient and cost effective way possible.

"It is my pleasure to provide my opinion of the work that your firm has undertaken for many Williams Company assignments over the years, and specifically the Roseland (NJ) Site Project. Your firm has always provided a quality service and have delivered its environmental and remediation assignments on time and within budget. I know that I can count on ESI to be professional and accurate, which has aided in Williams to fulfill their environmental responsibilities and meet regulatory requirements."

Michael C. Maben - Williams Companies

About ESI

Since our founding in 1975, ESI has provided the highest level of environmental and workplace expertise to our diverse range of clients.

Closely partnering with our clients and fully understanding their needs and objectives enables us to provide a customized suite of efficient and cost effective solutions to prevent or resolve any environmental pollution impact.

Contact us to learn how we can leverage our skills and experience to provide a custom solution to meet your unique needs.
