

ESI provides a wide range of workplace consulting services to fulfill regulatory requirements, satisfy clients' environmental health and safety (EHS) needs, and prevent losses

Environmental Health & Safety (EHS)

To ensure the safety of employees, residents, and local communities, ESI performs comprehensive environmental audits for clients at active commercial, industrial, and residential facilities.

These audits typically involve the identification and characterization of current or potential areas of environmental concern when evaluating sites for purposes such as regulatory compliance, property transactions, or business divestitures or acquisitions.

Concerns for environmental safety and rapidly changing environmental regulations make it important to have a current, comprehensive, and compliant EHS program in place.

An ESI facility audit provides you with the information necessary to understand regulatory changes that may affect your business and the surrounding community and assist you with the necessary steps to ensure regulatory compliance.

Our services prepare our clients for frequently changing EHS regulations and shifting economic conditions resulting in increased process efficiency and productivity, reduction of risks, enhanced community collaboration, and operational transparency.

We perform regulatory compliance audits that meet state and federal environmental rules and regulations for both small and large businesses and organizations. A comprehensive audit of a property will confirm compliance with current environmental rules and regulations, including environmental permitting and record keeping. If any areas of concern become apparent during an audit, our team of compliance experts can develop and execute an effective prevention or remediation strategy.

EHS Touchpoints

Indoor Air Quality (IAQ)

Lead Based Paint

Toxic Catastrophe Prevention Act (TCPA)

Resource Conservation & Recovery Act (RCRA)

Underground/Above Ground Storage Tanks (UST/AST)

Discharge/Spill Prevention & Planning (DPCC/SPCC)

Asbestos

Community Right to Know Act

OSHA Compliance

Solid Waste Management

Toxics Release Inventory (TRI) Reporting

Noise Control Act

About ESI

Every day, ESI's team of scientists, engineers, environmental professionals, and field personnel are providing comprehensive professional and field services to identify, prevent, and resolve environmental issues related to water, soil, air quality, and facilities. With innovative technical skills and clear understanding of our clients' goals, we effectively reduce or eliminate environmental impacts.

Contact us to learn how we can leverage our skills and experience to provide a custom solution to meet your unique needs.
