

Innovative Solutions. Global Reach.

Ecological & Natural Resource Services

Preserving our wildlife and natural resources is part of our commitment to providing a clean, safe, and sustainable environment for future generations to experience and enjoy.

Ecology is The Environment

ESI delivers a wide range of ecological solutions that include consulting and assessment, complete federal, state, and local permitting procurement, and comprehensive site services through to final project completion and closure.

Our clients depend on us to deliver timely, accurate and actionable information to help facilitate their project decisions.

When that project includes a potential ecological element, ESI's professional staff of wetland scientists, biologists, engineers, and regulatory compliance specialists will assess the ecological risks and develop a feasible, cost effective solution that meets project goals, satisfies regulatory requirements, and effectively protects the environment and ecology.

We have the experience and expertise to balance the environmental, ecological, and economic aspects of a project and deliver complete solutions, on time and on budget.

Permitting & Compliance

At every level of government, regulations focusing on habitat preservation and reclamation, endangered species protection, and ecological stewardship are rapidly changing and evolving, and may complicate all phases of a remediation or land development project.

Our regulatory permitting & compliance experts routinely navigate complex regulatory frameworks and negotiate practical solutions with the appropriate agencies on local, state, and federal levels to facilitate permitting for a wide range of environmental and ecological development, remediation, and restoration activities.

Ecological Permitting Touchpoints (the short list)

Clean Water Act (Sect. 404)

Surface Water Quality Standards

National Environmental Policy Act (NEPA)

Stormwater Discharge Permitting (NPDES)

Freshwater Wetlands Protection Act

Endangered Species Act (ESA)

Federal Energy Regulatory Commission (FERC)

Flood Hazard Area Control Act

About ESI

Every day, ESI's team of scientists, engineers, environmental professionals, and field personnel are providing comprehensive professional and field services to identify, prevent, and resolve environmental issues related to water, soil, air quality, and facilities. With innovative technical skills and clear understanding of our clients' goals, we effectively reduce or eliminate environmental impacts.

Contact us to learn how we can leverage our skills and experience to provide a custom solution to meet your unique needs.
